

WHY CCA?

We at CCA understand Northern Colorado offers a wide variety of educational choice for parents when considering schooling options for their children. We believe that CCA offers a unique educational experience for parents who are looking for the following for their student(s).

Strong Christian Worldview- CCA teaches everything from math to science from a Christian worldview; encouraging students to examine all that is taught from the perspective of the 3 grid questions that ask:

1. Where did man come from?
2. What is wrong with the world?
3. How can the world be fixed?

Strong Curriculum – CCA uses the Core Knowledge sequence for teaching which is a knowledge based, coherent, comprehensive, and cohesive curriculum. Included in this curriculum is the use of Saxon Math, Shurley English, Spalding phonics, Bob Jones Science and Summit Ministries Bible curriculum that specifically teaches worldviews

Modified Schedule – CCA offers a shortened in classroom school day that is more efficient use of time, offers more family time and more time to pursue outside interests and areas of student talent.

Math/Reading Grouping – The small size of CCA allows us to place students in the math or reading class according to their ability in that subject.

Parental Involvement – CCA allows parents to have a strong voice in their children's educational experience. We firmly believe parents are ultimately responsible for their child's education and we exist to come alongside parents and assist them as they fulfill this important calling.
